

III. Listing of Claims

1. (Currently Amended) An air-bag, the air-bag comprising at least one inflatable region, the air bag having an upper edge provided with a plurality of mounting tabs, each of the plurality of the mounting tab tabs defining an axis, the axis axes of each the plurality of the mounting tab tabs being inclined inwardly toward a region above the centre of the air-bag.
2. (Original) An air-bag according to Claim 1 wherein the air-bag is in the form of an inflatable curtain.
3. (Currently Amended) An air-bag according to Claim 1 ~~or 2~~ wherein each at least one of the tab tabs is inclined at an angle between 30° and 80°.
4. (Currently Amended) An air-bag according to ~~any one of the preceding Claims~~ Claim 1 wherein the upper edge is provided with the tabs including a first group of the tabs positioned near the center of the air-bag and a second group of the tabs positioned outwardly from the center and the first group of the tabs, the second set of the tabs ~~tabs located towards each end of the air bag are being~~ inclined with a more acute angle than the first set of the tabs located towards the centre of the air- bag.

5. (Currently Amended) An air-bag according to ~~any one of the preceding Claims~~ Claim 1 wherein each ~~of the plurality of tab~~ the tabs is formed of a woven fabric, the fabric having orthogonal warp yarns and weft yarns, the axis of each ~~tab~~ the tabs making an acute angle with the orthogonal matrix of the warp and the weft yarns.

6. (New) An air-bag according to Claim 1 wherein the axis of each of the plurality of the tabs being defined by a side edge of the mounting tab.

7. (New) An air-bag according to Claim 1 wherein the plurality of the tabs being formed of a single layer of material forming the air-bag.
